Python DataType Variable: how it is put together

sketched from the files

Python DataType Variable: the run, step by step

If a step fails, the honest run says so and stops.

traced, not guessed, GK

Product map: what Python DataType Variable is for

WHAT IT IS

A small project in Markdown, Python. The README and the files are the whole claim.

WHAT GOES IN

The files at the top of the tree: README.md, variable.py, LICENSE.

WHAT COMES OUT

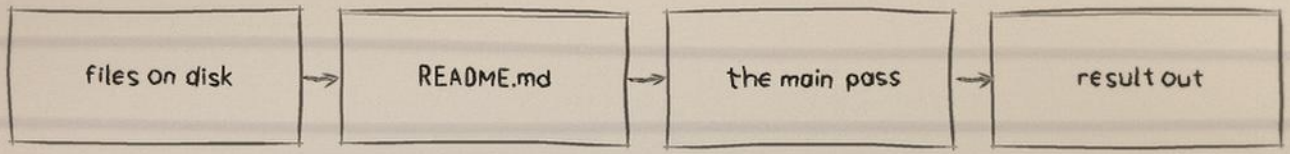

What the top files produce when they run or get read. Nothing else is promised.

WHERE IT STOPS

No service behind it, no account, no upload. If a path is untested, VISUAL.md says so.

mapped by hand,

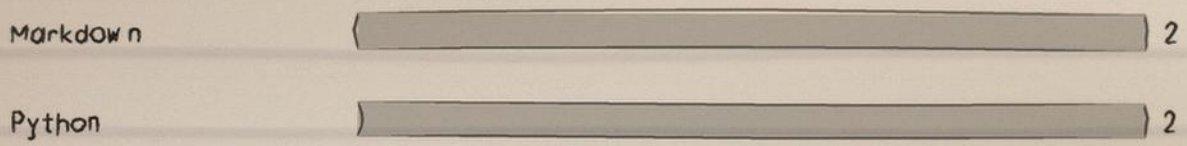

Python DataType Variable: data flow, in one direction

One direction. Anything the code does not do is not drawn.

Python DataType Variable in numbers, counted 2026-10-30

Counted from the local snapshot of this repo. Method for every number: VISUAL.md.

3 files in the tree.
2 commits, first 2023-02-11, last 2023-02-11, from the local git log.
No test files by name in this snapshot.

counted and drawn, GK

Python DataType Variable: Schematic of the apparatus

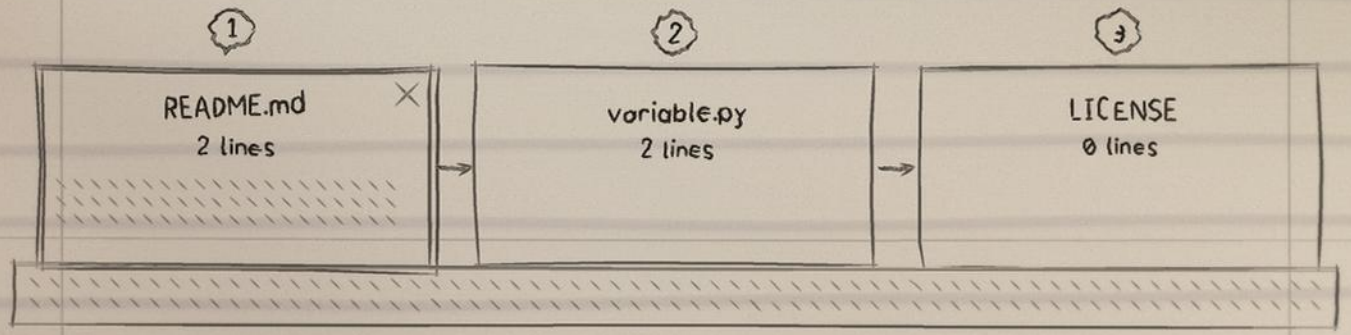

the system as a machine: parts, flow, and measurements

construction lines left in, as drawn

parts list

1. README.md
2. variable.py
3. LICENSE

in flow order, first to last

base plate: the repo itself, sectioned

span: 3 files, 4 lines counted

turns of the crank so far: 2 commits, 2023-02-11 to 2023-02-11

measured and sketched, GK
